

Instructions for BG Performance PP Engine Service for Gasoline Engines

**Note: Should not be used on Vehicles over 20 years old.
Not meant for heavily sludged engines.
Use at own risk, no warranty implied whatsoever.**

- 1. Install BG 44k Part # 208 in the gas tank with preferably a full tank of gas. Tank can be topped off after service.**
- 2. Start and bring engine to full operating temperature. Shut engine off and install BG EPR Part # 109 to the used engine oil and run engine at 1000 rpm 10-15 minutes.
Caution: It is not recommended to drive the vehicle during this process.**
- 3. Shut off engine and drain engine used oil as soon as possible. Caution: Engine oil may still be hot when draining. Install new OEM Factory engine oil and oil filter. Install BG MOA Part # 115 or MOA Part # 110 to new engine oil.
Caution: Do not overfill engine oil level.**
- 4. Run engine or drive vehicle for 10 minutes,**
